

Freedom to Breathe

A summary of the Freedom to Breathe Provisions in the Minnesota Clean Indoor Air Act

Background

The Freedom to Breathe (FTB) provisions were signed into law by Governor Tim Pawlenty on May 16, 2007, to protect employees and the public from the health hazards of secondhand smoke. The FTB provisions are an expansion of the current Minnesota Clean Indoor Air Act (MCIAA); the new provisions become effective on October 1, 2007.

The FTB provisions describe where smoking is prohibited, outline the responsibilities of employers and facility managers and list exemptions within the new MCIAA provisions that affect their workplaces and facilities.

Public Health Issue

Secondhand smoke is a leading cause of preventable death in the United States. "In 2005, it was estimated that exposure to secondhand smoke kills more than 3,000 adult nonsmokers from lung cancer, approximately 46,000 from coronary heart disease, and an estimated 430 newborns from sudden infant death syndrome."¹

According to the U.S. Surgeon General, there is no safe level of exposure to secondhand smoke. Secondhand smoke causes premature death and disease in children and in adults who do not smoke.

Smoking-prohibited areas

On October 1, 2007, smoking will be prohibited in virtually all **indoor** public places and **indoor** places of employment, including:

- Bars, restaurants, and private clubs
- Office and industrial workplaces
- Retail stores
- Common areas of rental apartment buildings, hotels and motels
- Public transportation, including taxis
- Work vehicles, if more than one person is present
- Home offices with one or more on-site employees, or used as a place to meet or deal with customers

- Public and private educational facilities
- Auditoriums, arenas and meeting rooms
- Day care premises
- Health care facilities and clinics

Definition of "Indoor Area"

"Indoor Area" means all space between a floor and a ceiling that is bounded by walls, doorways, or windows, whether open or closed, covering more than 50 percent of the combined surface area of the vertical planes [wall space] constituting the perimeter of the area, whether temporary or permanent. A [standard] window screen is not considered a wall.

Permitted smoking

The law does not prohibit smoking in the following locations or circumstances:

- Outdoor smoking, regardless of distance from building openings such as doors and windows
- Approved scientific study participants
- Traditional Native American ceremonies
- Private places, such as private homes, residences or automobiles when they are not being used as places of employment
- Sleeping rooms of hotels and motels
- Tobacco product shops - when customers are sampling tobacco products
- Cabs of commercial motor vehicles that weigh over 26,000 pounds
- Farm trucks, implements of husbandry, and special mobile equipment
- Family farm buildings, provided certain conditions are met
- Disabled Veterans Rest Camp in Washington County
- Theatrical productions, that is, actors and actresses who are smoking as part of the theatrical performance

Responsibilities of proprietors

Employers and facility managers continue to play an important role in controlling smoking in their place of business. In general, they are required to:

- Post “No Smoking” signs
- Ask persons who smoke in prohibited areas to refrain from smoking and to leave if they refuse to do so
- Use lawful methods consistent with handling disorderly persons or trespassers for any person who refuses to comply after being asked to leave the premises
- Refrain from providing ashtrays and other smoking equipment
- Refuse to serve noncompliant persons

Compliance and Enforcement

As part of the Minnesota Department of Health’s (MDH) compliance strategy, emphasis will be placed on educating the public and business owners on the new provisions. MDH has compliance authority over the MCIAA and may delegate compliance activities to local units of government.

In addition to the compliance authority provided to MDH and local units of government, local law enforcement has the authority to issue petty misdemeanor citations to proprietors or individuals who knowingly fail to comply with the MCIAA.

Local government ordinances

Local governments retain the authority to adopt and enforce more stringent measures to protect individuals from secondhand smoke.

Other provisions of the act

- Charitable gambling impact study. The state Gambling Control Board will prepare a report on the law’s possible impact on charitable gambling. The act requires the board to submit a report to the Governor and the Legislature before March 31, 2008.
- Dislocated worker program; allocation of funds. The Minnesota Jobs Skills Partnership Board will provide services under the dislocated worker program to certain employees who become unemployed between October 1, 2007 and October 1, 2009, because of the FTB provisions of the MCIAA.
